

Synergies between cosmic dust and star and planet form

KEYWORDS: Stars: formation - Accretion disks - Protoplanetary disks - planets and satellites: formatic interactions

SUMMARY: The aim of this special session is to bring together experts on the star and planet formation field progress made recently on the theoretical and observational fronts. The session will also serve to promote and synergies between different communities aiming to understand the origin of planets.

SOC: Mayra Osorio (chair/IAA-CSIC, Spain); Ignacio Mendigutía (chair/Centro de Astrobiología, CSIC-Huélamo (chair/Centro de Astrobiología, CSIC-INTA); Rubén Fedriani (chair/IAA-CSIC, Spain); Josep Martí (chair/IAA-CSIC+Guanajuato University, Mexico); Jorge Lillo-Box (co-chair/Centro de Astrobiología, CSIC Martikainen (co-chair/Instituto de Astrofísica de Andalucía); Matilde Fernandez (co-chair/Instituto de Andalucía); Roi Alonso (co-chair/Instituto de Astrofísica de Canarias); Itziar Garate-Lopez (co-chair/Unive Vasco UPV/EHU); Amelia Stutz, (Concepcion University, Chile); Miguel Vioque (European Southern Germany); Asunción Fuente (CAB, CSIC-INTA, Spain); Josep Martí (Jaen University, Spain)
