

Gaia ESA Archive hands-on session

KEYWORDS: Gaia, astronomy archives, galactic astronomy

SUMMARY: This lunch session is oriented towards any astronomer with an interest in learning how to access and use the contents of the Gaia ESA Archive (the main access point to the Gaia data and one of the most visited astronomical archives worldwide). The Archive is regularly updated with the addition of new catalogues, functionalities, and tutorials. This session aims to cover the following topics by means of interactive examples and hands-on exercises.

SOC: Héctor Cánovas Cabrera, Support Archive Scientist of the Gaia mission

CONTACT: Hector.Canovas@ext.esa.int
