**Contact:** [astronomia-y-cultura@sea-astronomia.es](mailto:astronomia-y-cultura@sea-astronomia.es)

**KEYWORDS:** History of Astronomy; Archaeoastronomy; Art; Science Visualization

**SUMMARY:** The observation of the cosmos and the registration of astronomical phenomena have pervaded across the world for millennia. The main goal of this symposium is to stimulate, for the first time in a SEA context, a depth reflection and discussion on the influence of Astronomy in human societies, from prehistory to today, and to account their cultural context. This objective will be approached from multiple perspectives by addressing topics framed within areas such as History of Astronomy, Archaeoastronomy and Art and Science Visualization. The symposium will consist of a series of talks mostly focussed on research projects related to "Astronomy and Culture" as described above. High impact outreach projects aligned with the main goal of the symposium will also be considered. Posters will not be considered.

**SOC:** Montserrat Villar (CAB), chair; Fernando Buitrago (Universidad de Valladolid), chair; Juan Antonio Belmonte (IAA-CSIC), co-chair; Ángel Gómez (Astronomía Magazine); Sofía López (Freepik); Nerea Maestu (Universidad Complutense de Madrid); Amelia Ortiz (Observatorio Astronómico, Univ. de Valencia); Enrique Pérez Montero (IAA); Ana Ulla (Universidad de Vigo)
